

Over 40 years of **Meyer** Lens  
production

At the end of last century there were only a few who could foresee the astounding advance in photography as we know it to-day. Even then very serious workers produced wonderful results which are still admired to-day, but the decisive period in photography started with the development of small precision instruments and precision large aperture Lenses of maximum correction.

In the year 1896 Hugo Meyer, Senior, Master of Optics, founded the Optical and Precision Works of Hugo Meyer & Co. Görlitz. Silesia, and since that date the firm has taken a considerable share in the development and improvement of photographic Lenses.

**The name MEYER stands for  
perfection and reliability with  
professionals and amateurs  
in all parts of the world.**

A Biography describing the advance of this firm from three hands to its world famed position to-day, is given in our principal catalogue.

**HUGO MEYER & CO. GÖRLITZ**

Printed in Germany

## Colour photographs

are only successful if the exposure is 100% correct. There is no margin for difference in exposure, therefore the demand on the lens is considerable to obtain true reproduction of colour, particularly when photographs have to be taken by artificial light, indoors or outdoors.

This is fully guaranteed by the excellent correction of  
**PRECISION LENSES.**

Particulars of Meyer Interchangeable Lenses for Miniature Cameras in conjunction with Colour Photography sent on request.

## Interchangeable Lenses See and - Snap

A passing incident (never to happen again) is secured for ever and provides many a reward of joy to the photographer.

Good Photography means to have confidence in your instrument, particularly the lens, and an eye for perspective, not simply button pressing. To be able to depend on the lens means success.
