Roll Film or Film Pack

CAMERA

IHAGEE DUPLEX

FILM PACK CAMERAS

6½x9 cms. and 9x12 cms.

Duplex Film Pack Cameras are precision made to serve every photographic purpose of the amateur and professional. They accommodate film packs, plates, or cut films when film sheaths are used in the plate holders. The camera body is all metal, attractively covered in leather, and finished with chromium edging. The lens itself is mounted on a U standard on which are the rising and falling front and sideswing adjustments. Its double extension leather bellows allows for photographing objects actual size, and rides on an accurately machined track with direct geared rack and pinion focusing. This keeps the lens in perfect focal plane with the film. Fitted with a brilliant reversible finder with spirit level, wire frame peep sight finders, all cameras are furnished with a Film Pack Adapter, Ground Glass Focusing Back and three holders in a leatherette case.

Available in the following models with fast Ihagee Anastigmat lenses in Prontor II Self Timing Shutters to 1/150th of a second, and Zeiss Tessar lenses with Compur Self-Timing Shutters to 1/200th:
